<b>Start date</b>	1 September 2017
<b>End date</b>	31 August 2022
<b>Objective</b>	
<p>I-LEAD's focus is on the incapability of groups of operational Law Enforcement Agencies (LEA) practitioners defining their needs for innovation. This will be done in a methodological way, also with the help of the research &amp; industrial partners supplemented by a broad range of committed stakeholders. I-LEAD will build the capacity to monitor the security research and technology market in order to ensure a better matching and uptake of innovations by law enforcement agencies with the overarching aim to make it a sustainable Pan-European LEA network. Earlier funded European research with a high technology readiness level as well as pipeline technologies will be closely monitored and assessed on its usefulness. Where possible a direct uptake from this research will be facilitated and implemented in the ENLETS and ENFSI networks supporting the action. I-LEAD will indicate priorities in five practitioner groups as well as aspects that needs (more) standardization and formulate recommendations how to incorporate these in procedures. As a final step, I-LEAD will advise the Member States through the existing EDBP-ESTP procurement group about how the outcomes of this project could be used in Pre-Commercial Procurement and Public Procurement of Innovation activities.</p>
